

MODULAR HOME | 124 m²

Efficiency | Speed | Precision

GENERAL CONCEPT

SIZE: 124 m² (single storey)

BUILDING TYPE: Modular House

CONCEPT: New-build modular

HOUSE KIT / SIP CONSTRUCTION

The house is delivered as a fully engineered SIP-based kit, manufactured in a controlled factory environment for precision and consistent quality.

High-performance SIP walls achieve a U-value of up to $0.17 \text{ W/m}^2\text{K}$, ensuring excellent thermal efficiency, fast installation and a predictable construction.

EXTERNAL FINISHES & WINDOWS

The exterior combines a standing-seam metal roof with durable wall finishes, including brick and ceramic cladding. High-performance PVC windows improve thermal efficiency, comfort and overall building performance.
